

FRANK AND ANDY

AND

Two neighbors living in Hollywood...

Frank's dream was simple: to write and record one song. He had a drawer full of lyrics but needed music for his words. While walking in his Los Angeles neighborhood, Frank met Andy; a local session guitar player out riding his motorcycle with a guitar strapped to his back. They became fast friends. During the summer months, they casually penned 8 songs, which span several musical genres. As they listened back to their crude couch demos, it became clear they needed to record the music professionally. Frank, a Vietnam War vet and former comedy writer was getting a new lease on life. With songs in hand, they headed to the studio, roping in their talented LA friends along the way. We are currently seeking commercial representation for song placement.
